Domestic Dogs

The dog is a domesticated canid which has been selectively bred over millennia for various behaviours.

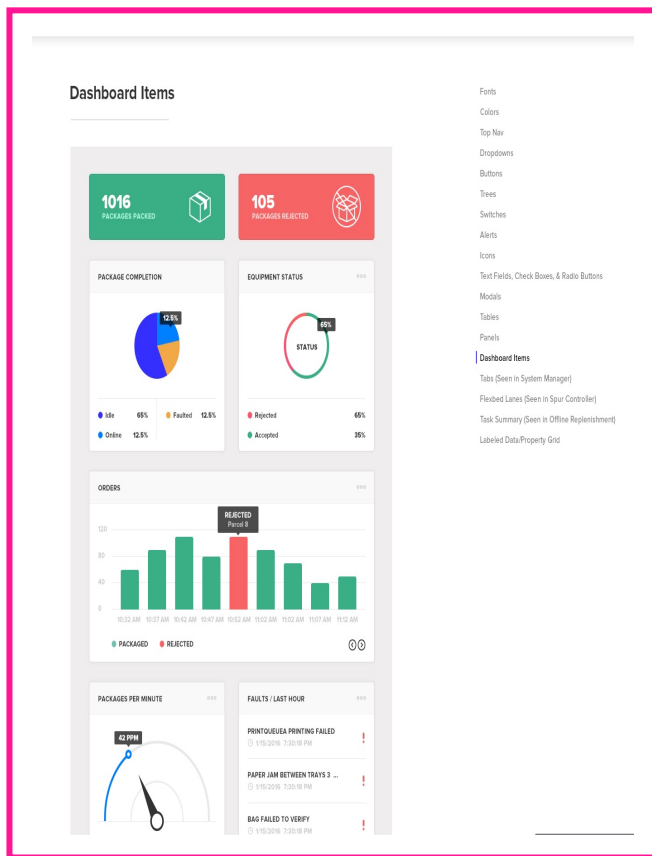

Scientific name: *Canis lupus familiaris*

Average Height: 2.5 – 42 in.

Average Lifespan: 10 – 13 years

Daily Sleep: 12 – 14 hours (Adult)

The dog is one of the most popular pets in the world (of course cat lovers will argue for cats). Domestic dogs have long played an important role in the lives of humans. It's thought that dogs have been pets for thousands of years. Dogs are often called Man's Best Friend. This is because dogs help man out in so many ways.
